

UL67 Compliant Service Barrier Kits and Accessories - Summary

- Panel Boards: These Service Barriers are Factory installed on Service Entrance Factory Built Panel Boards
- Pro-stock Panel Boards: These Service Barriers must be ordered as a separate kit, unique to the breaker frame as listed below
- Load Centers: These Service Barriers are Factory installed on Main Breaker Load Centers, Main Circuit Breaker kits and Main Circuit Breaker retaining kits
- These Service Barriers became a UL requirement on Jan 1, 2017 and factory installation of the below kits was implemented on or before Jan 1, 2017
- The below kits are mostly for replacement purposes except for the Load Center Retainer Kits which are listed here to show they now include the Service Barriers and Pro-stock panels
- Inspectors should not be requiring the kits unless they are enforcing NEC 2017 in their jurisdiction
- Inspectors should not be requiring the kits unless the product was manufactured post Jan 1, 2017 - UL is the enforcing agency on the kits leaving the plants
- NEMA Category: 513-10A
- Service Barriers UL listed (Molded-Case Circuit Breakers No. 489 and/or Panelboards No. 67) and compliant to UL 67 standards
