

Low Profile MINI® 10.9mm **Blade Fuses**

Low Profile MINI[®] 10.9 Blade Fuses Rated 58V

The Low Profile MINI[®] fuse has similar performance characteristics as the standard MINI[®] fuse. The lower overall height allows for more space and weight savings. The Low Profile MINI® fuse is designed to mate with tuning-fork terminals, which provides additional weight and material savings in fuse box designs by eliminating the need for female box terminals.

The typical I²t is an average value calculated from the breaking capacity tests by using the melting time before the arcing occurs.
